Response to Amendment

1. Applicant's amendment of November 18, 2002 is acknowledged and entered as paper number 14 in the case file wrapper.
2. The amendment and remarks been fully considered.
3. All of the appropriate 35 USC paragraphs can be found in the office action of August 1, 2002 and will not be repeated herein.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 14-16 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claims 14, 15, and 18 recite the limitation "said separate tubes." There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. Claims 13-16, and 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Singh.

The patent to Singh shows a nozzle 13 for a burner, the nozzle comprising a:

- a body having a first end adapted to attach to the burner and a second end, the first end having a plurality of inlet holes and the second end having a plurality of outlet holes, each inlet hole being connected to a single outlet hole by a separate tube 20 and 21 (see Figure 2), wherein all of the separate

- tubes in the body extend along a common plane (see Figure 2) and the separate tubes are linear as recited in claim 14 of the instant invention;
- wherein at least one of the separate tubes 17 includes a first linear section connected to one of the inlet holes and a second linear section connected to one of the outlet holes (see Figure 2), the second linear section being provided at a predetermined angle in relation the first linear section (see Figure 2) as recited in claim 15 of the instant invention.

Allowable Subject Matter

8. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. Claims 1-5, 9, 10, and 11 are allowed.

Response to Arguments

10. Applicant's remarks regarding claims 13, and 19 have been fully considered. Applicant's remarks that the Singh reference does not disclose a nozzle for a burner including a body having separate tubes where all of the separate tubes in the body extend along a common plane is acknowledged, however, this limitation is not recited in claims. Thus, the patent to Singh recites all of the limitations of claims 13 and 19.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
